

## Introducing **eForms**... simplifying and streamlining the flow of data...

- Save time and effort, reduce costs, enhance accuracy

Your eForms are “fillable” Adobe.pdf v7.0 documents... you start filling them out... then e-mail them... everybody on the accountability trail... adds information relative to their responsibility... last-in-line clicks send... automatically transmitting the eForm to Welltest Specialists...

- Add required attachments (ASCII, CMP, BIN, FLD, FKT files)
- Have Welltest Specialists do all your technical reporting

**Engineer >>> Field Consultant >>> Service Company ≈≈≈ Welltest Specialists**

**Program eForms:** Wireline, Production and Surface data tests...

- All input fields are required data for AEUB.pas files
- Specify test details (sand returns, flow and shut-in times, on bottom times)
- Wireline “run sheet” (gauge info, gradient stops, run depth)

**Engineering Data Sheet:** Send your tests in for analysis...

- Basic information for pressure transient analysis
- Click transmit and add appropriate attachments
